Experienced Leadership; Proven Results

Rest Easy by Selecting a Biometrics Partner That Will be With You for the Long Haul

Invest in a company with a proven track record of successful biometric fingerprint technology deployments, a strong customer base, and a profitable business model.

M2SYS Biometric Software Solution Selected By GHG Corporation

Prominent Employee Time Tracking Software Provider to Offer Enterprise Biometric Technology

Atlanta, August 4, 2009 – M2SYS Technology, an award-winning biometric technology research and development firm, announced today that GHG Corporation, an innovative time tracking software provider, has chosen to provide their customers with M2SYS' Bio-SnapON™ biometric software solution.

Bio-SnapON™ allows GHG to instantly add biometric recognition capabilities to their web-based employee time tracking software, known as "eTSS", to eliminate buddy punching – the act of one employee clocking in for another. Because there is no software development work required to integrate Bio-SnapON™, GHG was able to remain focused on its core competencies and avoid a lengthy time-to-market cycle. With the biometric software add-on, GHG customers have the option to use either fingerprint or finger vein readers to facilitate the biometric identification of employees. The use of biometric technology helps GHG customers to maximize profits and ensure accurate employee time tracking.

"We selected M2SYS due to their excellent customer service and outstanding reputation for providing cutting-edge biometric technology," stated John Denny, Chief Technical Officer of GHG Corporation. "Bio-SnapON™ saves GHG time, money, and headache while providing its customers with a proven biometric software solution and the option to use either fingerprint or finger vein recognition. It's a winning combination," he added.

"GHG Corporation can rely on M2SYS for the proactive and dedicated support of our biometric software, as well as the future availability of other forms of biometric technology," commented Mizan Rahman, CEO and Chief Engineer of M2SYS Technology. "We are excited about being chosen by GHG Corporation, and look forward to a long-standing partnership with them."

About M2SYS Technology
M2SYS Technology, www.m2sys.com, is a recognized industry leader in biometric identity management technology, delivering a wide range of turnkey biometric software solutions and biometric readers for businesses and consumer use. M2SYS was awarded the prestigious Frost and Sullivan Biometric Technology Innovation of the Year award in 2007.

About GHG Corporation
GHG Corporation www.ghg.com is an established disabled veteran-owned corporation of over 30 years, with corporate offices in Houston, Texas. GHG offers time tracking software and other project management solutions. GHG has extensive background supporting private industry, city, county, state, and federal governments with web-based timesheet solutions and other innovative management systems.
